Dear Committee,

I am writing to inform you of my interest in the Web Design and User Interface microprogram offered by Concordia University. I am an Iranian-Canadian student, and I have recently graduated from Dawson College with a degree in health sciences and an R-score of 32.744. I am a fast learner and a hard-working person and I am looking to develop new skills. I passed my courses with an average of 88% in biology, and 80% in math and physics. I have some knowledge of web designing, and I am currently learning programming and working with Unity software. Also, I have skills in pixel art animation, jewelry making (metal and clay), knitting, and drawing with different mediums.

I am interested in learning about digital art and 3D design. I am a creative person and I am good at problem solving and thinking out of the box. For instance, I designed a theoretical machine to convert sound energy of stadiums into electricity and I won a competition in designing and building spaghetti bridges in high school in Iran. I am also good at team work and time management, and I applied them in designing video game characters for game jams with other students. I am willing to work in groups and learn from ideas and experiences of others. I also worked part time as a manager in a café, and gained experiences in leadership and management. I have done several independent studies as well, namely on visual perception at Dawson College and I participated in biology and physics competitions in Iran.

This year, I have started taking online courses on “User Experience Design essentials - UI and UX Design”, on “Adobe Illustrator CC- Essentials training”, and on “Adobe Photoshop Course for Beginners” by instructor Daniel Walter Scott, as a way to better prepare myself for my future in the design industry.

I believe the Web Design and User Interface microprogram at Concordia University is a really good opportunity for me to learn new skills and polish my previous ones. This microprogram will help me better understand the needs of the user and how I can provide a better service for them through a website. Thank you for your consideration of my application, and I look forward to hearing from you.

Yours sincerely,

Helia Gol Mohammadi
